## DELPHINIUMS

FROM ALL PARTS OF THE COUNTRY

MANY of my friends have been kind enough to send me, from time to time, written expressions of appreciation of the wonderful merits of my Delphiniums. This year (1928) however, many photographs have reached me from various parts of the country, and I reprint a few of them below (very much reduced of course), but space will not permit me to give the names of the senders, or other particulars. All this is very gratifying and deeply appreciated by me, and no doubt some of my readers will recognize their gardens here reproduced.

(See pages 14 to 18)

## WILLIAM C. DUCKHAM

Madison, New Jersey

A Model of Delphinium Perfection (see pp. 14 to 18)

One of my Hardy Borders in the center aisle, N. Y. International Exhibition, March 1927. Delphiniums were the chief feature, but the delighted patrons of the show, marvelled at the excellence of the entire stock, forced into bloom for this great occasion. This exhibit was unanimously awarded a special Gold Medal (see page 16).

T HAS been my privilege and great good fortune to secure the exclusive American distribution of a few extra choice types of Hardy Flowers, from some of my European friends whom I had the pleasure of meeting on my periodical visits over there.

Delphiniums of course are my specialty. (See pp. 14 to 18.)

Some remarkably fine Aquilegias (Columbines) have come into my possession, and I venture to say that nothing heretofore offered can compare with the exquisitely odd colors found among these hybrids, all of which are the true English, long spurred types with huge flowers.

My hybrid Gaillardias offered further on, should command your special attention. These are very large with petals of great substance, closely set and brilliantly pigmented with red and brown,—a remarkable contrast with the golden yellow tips.

Again I offer some choice *Perennial Lupines* (Polyphyllus). These have been warmly acclaimed by the English Hort. Soc. and suitably granted awards in recognition of their superb size and extraordinary colors.

The Scabiosa Hybrids should also meet with favorable consideration by the reader, and I feel sure that much pleasure will be derived by those who choose to give them a trial.

All the other Hardy Plants in my list are of high standard, secured from sources of National repute—and the liberal field clumps which I send out will undoubtedly give immediate and prolific flower production to the general satisfaction of the buyer.

Award from Newport, R. I. Hort. Soc. 1928

My Exhibit of Hybrid Delphiniums at New York International Flower Show, March 1928. Remarkable for the size and perfection shown in these forced flowers. (See pp. 14-19.)

## Arranging and Planting the Hardy Flower Border

Every group or border of Perennial plants should be planted according to some prearranged scheme and with a definite object in view. A rough plan should always be made and the different varieties located in their proper places, keeping in mind the height and color of each. It is desirable to place hardy borders where a background of dwarf trees or shrubs aids in setting off the beauty of the flowering plants.

If such is not available, a vine covered fence or wall answers very well, though a special planting of dwarf evergreens and flowering shrubs is comparatively inexpensive, easily accomplished and will amply repay for the little

extra trouble involved.

Preparing the Ground.—The ground should be spaded over to a depth of from eight to ten inches—if virgin soil, turn the sods under where they will rot and form a good fibrous loamy foundation for the border. Spread well-rotted manure over the bed after the first spading, and mix it thoroughly through the top 4 or 5 inches. Slaked lime is a valuable aid to the development of young roots on the growing plants and helps to purify the soil.

Planting.—A scoop trowel is the most practical tool to use. Lay the plants in their respective positions according to your prearranged plan—keep the taller growing varieties to the rear of the border, selecting varieties of lower stature as you proceed to the front. The distances apart depends upon the height.

Color and height must always be considered and careful thought given to contrasts and harmonious blending, thus avoiding later lifting and regrouping.

Every perennial border should receive a light covering of dry litter, such as grass clippings, leaves, or strawy manure after the first severe frost has nipped everything down in the late Autumn. A light covering of rotten manure previously laid over and around the plants is also desirable; this can be turned under with a fork in the Spring.

# HARDY PERENNIALS from Imported Stocks

A Typical Flower of Duckham's New English Aquilegias

## New English Improved Long-spurred Aquilegias

With their odd shapes and delightful shadings, Aquilegias (Columbines) are among the best of all Hardy Garden Plants. They thrive in almost any location, but prefer a partial shady and moist position. The kinds offered in this strain are perhaps the best and most beautiful in existence, having very long spurs and most charming delicate colors, including Pink, Blue and Lavender, Red, Cream and White, that are decidedly new and interesting.

Price, each 50c; 3 for \$1.25; per dozen \$4.50

## New Hardy Asters

(Michaelmas Daisies)

Here are two very fine Autumn flowers, for those whose Hardy Borders lack color towards the end of the season.

## Aster, Barr's Pink

A lovely light mallow pink with stiff petals and a brilliant golden center, growing from 3 to 4 feet high. Well branched and the flowers are admirably spaced. The individual flowers are  $2\frac{1}{2}$  in. in diameter, coming into bloom about the middle of September, and add a mass of glowing pink to the Fall garden. Price, each \$1.00

## Aster, British Queen

A soft lavender blue, semi-double, unusually large open flowers with pale yellow center. A vigorous growing well branched plant that comes into bloom early in September. Height about 4 feet. Excellent for cutting and decorations.

Price, each \$1.00

New Aster, Barr's Pink

(For other Hardy Asters, See Page 8)

## Gaillardia

(Blanket Flower) 2 ft. June-Oct.

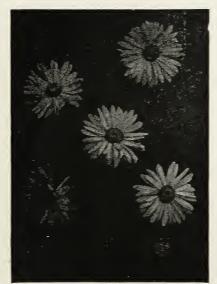

### Duckham's New Hybrids

The Gaillardias are among the most successful of hardy perennials and give a most striking effect when planted in bold groups or in a bed by themselves. They are equally effective, however, in mixed borders. They seem to thrive in the most extreme drought and the greater scarcity of other flowers the more the utility of this hardy perennial is demonstrated. They will bloom perpetually from June to November and provide quantities of cut flowers which when kept in a cool room will last over a week. The following list of varieties has been selected as the best, the colors ranging from burnt orange, brick red, scarlet to deep crimson, with vellow margins,

Each 50c; 3 for \$1.25; doz. \$4.50

Gaillardia, New Hybrids

Duckham's New Pyrethrums

## Pyrethrum

(Painted or Persian Daisy)

2-3 ft. May-September

For profusion of flowers in season nothing can surpass the charming variety of the Pyrethrums. They are easily and simply cultivated and are recommended to all who possess an oldfashioned garden, whether large or small. They are perfectly hardy, are not injured by storm or sun. The flowers are bright and showy in the garden and are borne on long stiff stems which make them most desirable for vase decoration. They are very well named "Spring Chrysanthemum" and are often called "Poor Man's Chrysanthemums." The mixed varieties I offer are especially rich in the charming pink shades.

Each 40c; per doz. \$3.75

Gypsophila "Bristol Fairy" with Gaillardios

## Lupinus Polyphyllus (Hardy Lupine) 3-4 ft. June-Sept. A New Range of Colors

The hardy perennial varieties of Lupinus are extremely handsome and stately, bearing their beautiful flowers of rose, white, blue and lavender in graceful spikes that are more than a foot in length.

They are certainly among the most striking of hardy perennials, and bloom continuously and profusely during the summer.

I believe that those who love this valuable flower will be delighted with the new shades that are included in my hybrids. The spikes, too, are much larger than found in ordinary Lupinus Polyphyllus.

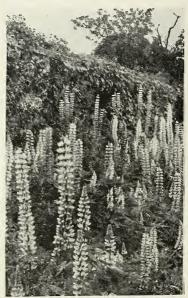

Mixed Hybrids: Price, each 75c; 3 for \$2.00; dozen \$7.50

## New Gypsophila Bristol Fairy

Bristol Fairy has all the virtues of the well-known Double Baby's Breath (Gypsophila paniculata flore-pleno) but it is superior in these respects: Its flowers are almost three times larger, are pure snow-white under all conditions, and being more widely spaced, are better poised and more graceful in every way. Its growth is more vigorous and sturdy, attaining a height of 4 feet, with a spread fully as broad.

Best of all, after the first flowers are cut, it flowers periodically until severe frost, so that cut sprays are always available and the plant is attractive throughout the season.

Strong field-grown plants \$1.50 each; \$15 per doz. Extra-heavy plants, \$2 each; \$20 per doz.

Duckham's New Lupines

Duckham's Delphiniums in a famous garden. Note comparative height of man and flower spikes (for description and prices see pp. 14 to 18).

## **GENERAL LIST OF HARDY PLANTS**

### Aconitum Fischeri

(Monkshood)

A very attractive, erect, hardy perennial, with odd-shaped blue and white flowers in autumn. Not unlike the Delphiniums in general effect, but of course not nearly so large. Particularly good in shady borders.

Price, each 40c; dozen \$4.00

## Aconitum Napellus Bicolor

(Bicolor)

This is one of the tallest and finest of the Aconites, and a fine subject to group among the rear plants in the border. Grows 4 feet high with huge spikes of blue and white flowers. June to August.

Price, each 40c; dozen \$4.00

#### Achillea Ptarmica

"The Pearl" (Millfoil or Yarrow)
2 ft. June-September.

Indispensable in every border both for their graceful appearance and usefulness for indoor decoration. Flowers are pure white and literally smother the foliage in their great profusion.

Price, each 35c; dozen \$3.50

## Alyssum (Madwort) 1 ft. May, June

Pretty little plants for beds, vases, baskets, edgings, or rockwork, blooming profusely like a sheet of gold. Useful also for winter flowering in pots. Very sweetly scented.

Price, each 25c; dozen \$2.50

Brooklyn, N. Y., Nov. 15, 1928.

<sup>&</sup>quot;It is with pleasure that I acknowledge the satisfaction derived from plants supplied by you last Fall. The hollyhocks had some fine blooms. The aconitums were beautiful this Fall, and I am more than pleased with the aquilegias, which, with the aconitums, beautified a shady place in my garden."

Arabis Alpina, on garden wall

#### Allwoodi

(Everblooming Hardy Pinks)

This new race of the Dianthus family flowers perpetually during the entire spring, summer and autumn. No plant is hardier or of easier cultivation, and their freeflowering qualities have rendered them exceedingly popular. range through many shades of light, medium and dark pink and crimson, and all are deliciously fragrant.

Mixed, 35c each; \$3.50 per doz.

#### Anchusa Iralica 4 to 5 ft. May-July

Dropmore Variety-A large spreading bushy plant, requiring plenty of room to develop its great beauty. This variety is a great acquisition and improvement on the old type and of extremely vigorous constitution. Its flowers are of deepest blue, borne in immense sprays.

Price, each 30c; 3 for 65c

#### Anthemis Tinctoria

1½ to 2 ft. June to September Better Known as the hardy Marguerite. Thrives in almost any soil without much attention. Deep golden yellow, daisy-like flowers; ideal for decor-Price, each 35c; 3 for 80c; dozen \$3.00 ative purposes.

## Arabis Alpina

(Rock Cress) 6 in. March-June

An excellent dwarf plant for rockwork, borders or carpeting where massed color effect is desired, covered during its blossoming season with myriads of Price, each 25c; 3 for 65c; dozen \$2.50 snow-white flowers.

## Hardy Asters (Michaelmas Daisies)

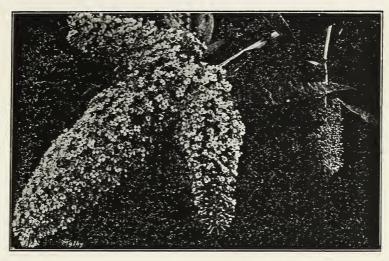

2 to 3 ft. September-October

The many species, widely distinct from each other in habit and form, are with a few exceptions, all native of North America. It is in Europe, however, that our Asters have been most highly appreciated. Many improvements have been made by European growers, and many hybrid forms have been produced by crossing the different species. (For New Hardy Asters, See Page 4) Three shades: Pink, Blue or White; each 50c; 3 for \$1.25; doz. \$4.50

#### Boltonia

4 to 6 ft. July to October

Latisquama—A fine plant for borders or shrubberies, requires plenty of room for full development. Flowers resemble large white daisies or single asters and are borne in great profusion, lasting a long time both on the plant or in water. Worthy of liberal planting. Price, each 45c; 3 for \$1.00 doz. \$3.50

The Graceful Butterfly Bush" (Buddleia)

## Bellis perennis

(Hardy English Daisy) 4-8 in. April to June

An ideal plant for borders, but most effective when massed as a carpeting or edging.

Monstrosa.—A monster variety—the largest of all with flowers 1½ inches in diameter, of deep rose-pink shade.

Pink Princess.—Large flowers of a delicate pink shade.

Tubulosa.—New and distinct. Double flowers of a peculiar quilled formation.

Any of the above, 25c each; 65c for 3; \$2.50 per doz.

### Buddleia Variabilis Veitchiana

(Summer Lilac or Butterfly Bush) 3-5 ft. August to October

In mild climates this is really a hardy shrub, but it may also be classed as herbaceous. Each Spring it throws out vigorous growths that develop all Summer to terminate in August and September in tapering spikes of a beautiful lavender-mauve shade. Give it plenty of room, for in itself it is a perfect model of exquisite form and color. If it does not die to the ground in Winter, cut it back hard each Spring. .Price, Strong roots, each 75c; 3 for \$1.50

## Chrysanthemum Maximum

(Hardy Daisy) 2-3 ft. June to August

King Edward VII.—Pure white, one of the largest and best. Flowers of fine form. One can hardly plant too much of this most useful and beautiful flower. It thrives almost anywhere, and provides continuously, during its season, quantities of blooms for indoor decoration. Each, 35c; dozen \$3.50

## Coreopsis (Tickseed) 2 ft.

One of the most popular hardy plants. The flowers are a rich golden yellow of a beautiful, graceful form and bloom from June to October.

**Grandiflora.**—2 ft. Large orange-yellow flowers on long, graceful stems. About the best yellow cutflower blooming incessantly.

Price, each 25c; 3 for 65c; dozen \$2.50

Campanula (Medium)

### Campanula

(Bellflowers)

A very important class of plants, varying in height from 6 inches to 6 feet, all of extreme beauty and easy cultivation. They thrive in almost any garden soil, but do much better if placed in a well-drained, rather rich, sandy loam. The following are the best varieties.

Carpatica. (True Harebell.) 9 in. July. Dwarf spikes of blue flowers, Excellent for edgings and massing. 35 cts. each; 85 cts. for 3.

Carpatica alba. 9 in. July. White form of the preceding. 35 cts. each; 85 cts. for 3.

Campanula Medium. (Canterbury Bells.) 2 ft. June, July. Old-fashioned, well-known, yet indispensable in every hardy plant border. Offered in separate colors, Rose or Blue. 25 cts. each; 65 cts. for 3; \$2.50 per dozen

Persicifolia alba. (Peach-leaved Bellflower.) 2 ft. July. Graceful spikes of white flowers; very hardy. 35 cts. each; 85 cts. for 3.

Pyramidalis. (Chimney Bellflower.) 5 to 6 ft. August, September. Throws up huge stems, covered three-quarters of their length with deep blue flowers. Exceedingly effective for the back row of a border. Try this with lavender delphiniums and Lilium candidum, giving it an early start in pots in a cold-frame. 40 cts. each; \$1 for 3.

## Delphinium—See pp. 14 to 18 Digitalis

(Foxglove) 3-4 ft. July-August

The tall flower-spikes of the foxglove are particularly handsome when grown among shrubbery or naturalized in odd places in bold masses. As a background for plants of dwarfer habit they are very attractive.

Pink, White, Purple and The Shirley. Each 35:; dozen \$3.50

Digitalis (Foxglove)

#### Dianthus

(Hardy Pinks) June-October

A very interesting class of plants, with dainty flowers, characteristic of the kinds that really belong to old-fashioned gardens.

Dianthus "Beatrix." A new and beautiful hybrid, having double soft pink flowers. Blooms from June until October. Each \$1.00; 3 for \$2.75.

Deltoides (Maiden pink). Dwarf. Beautiful pink flowers, fine for edging.

Etoile de Lyon. New hardy crimson pink.
This variety is brilliant crimson, the first of this color in the true hardy Pinks. It grows about a foot high and produces masses of its richly colored, clove-scented flowers in May and June. Excellent for cutting.

Plumarius Hybrids. The old-fashioned Clove scented Pinks. Colors from white to deep rose with beautiful fringed petals. Very fragrant. 1 ft June.

Dianthus Plumarius

Price, Any of the above except "Beatrix," each 25c; 3 for 65c; doz. \$2.50

## Dicentra Spectabilis

(Dielytra, Bleeding Heart) 11/2 ft. May, June.

A very popular old-fashioned hardy border plant with beautiful foliage and long, drooping sprays of pretty pink, heart-shaped blooms. 80 cts. each; \$8.00 per doz.

#### Geum

(Avens) 12-18 in. June-September

A very desirable class for borders or Rock Garden. The flower spikes stand boldly over the rather prostrate, deep green foliage. Photo here shows a well established plant on

Geum

Mrs. Bradshaw. Brilliant double orangescarlet flowers; blooms fully throughout the summer, being especially desirable for cutting both for its attractive color and lasting qualities.

> Price, each 35c; 3 for 85c; dozen \$3.50

Lady Stratheden. New, fine double yellow of same type as Mrs. Bradshaw.

Each, 50c; dozen, \$5.00

Norfolk, Va., June 26, 1928

<sup>&</sup>quot;My delphiniums bought from you last Fall are in bloom now. They surpass in beauty any I ever saw, and each one is a different shade. I shall have to have more this Fall. Everyone who sees them exclaims 'I never saw delphiniums like those. Where did you get them'?"

## Gypsophila Paniculata

(Baby's Breath)
2-3 ft. July-August

A very valuable perennial because of its light, graceful form and the charm it adds to mixed bouquets of other flowers. The blooms are small, borne in great quantities in loose white panicles. Will grow and thrive in almost any soil.

Price, each 35c; doz. \$3.75

A Typical Plant of Gypsophila Paniculata

#### Helenium

(Sneezewort)
3 to 4 ft. August, September
Snowy autumn flowers of great value
for garden display in bold masses, and
effective when cut.

Riverton Beauty. Long stemmed, brownish crimson flowers; a very popular Autumn flower.

Riverton Gem. A great profusion of bronzy-orange flowers.

Either of the above, each 40c;

3 for \$1.00

## Helianthus decapetalus multiflorus

6 to 8 ft. June to Sept. The flowers of this Hardy Sunflower are deep golden yellow and very attractive. 35 cts. each; 85 cts. for 3

## Hollyhock

(Althea Rosea) 6-8 ft. July-September

One of the best known of all hardy plants and a necessity in every old fashioned garden, where a place in the background should be assigned to it either in solid lines or frequent groups. My strain is indeed very wonderful, the flowers being extremely large, double and unique in color.

DUCKHAM'S IMPROVED STRAIN in following colors:

Maroon, Yellow, Pink, Deep Rose, White, Salmon, Crimson and Faust. Price, each 35c; dozen \$3.75

## Hardy Irises

(Fleur-de-Lis) May-June

Irises are to be found even in the humblest garden, often without a sole companion. All are lovely and everybody loves them. They are easily grown and increase very rapidly. The colors cover almost every imaginable shade from white to violet, and the markings and veinings in the petals are truly exquisite. They like a well drained soil and plenty of sunlight, and when massed on the edge of the border or near the brinks of ponds or streams the effect is remarkable. I offer them in 5 separate shades assorted from the better named varieties.

Light Blue and Lavender
Deep Blue and Violet
Bronze shades
Yellow shades
White and light shades
Price, 3 for 65c; dozen, \$2.50;
100, \$15.00

### Myosotis

(Forget-me-not) 6-12 in. May
Alpestris, Royal Blue. The dainty Forget-me-not loves a cool moist soil, and like the pansy, blooms most freely in early spring, and quickly establishes itself by self-seeding. Royal Blue is a rich deep blue of remarkable free-flowering habit.

Price, each 25c; 3 for 65c; doz. \$2.50

Williamsport, Pa., Oct. 24, 1928
"Just a line to advise you that my perennials arrived in good shape. They were well packed, and look like very healthy stock."

How Can One Resist a Garden of Irises Like This. (See page 12.)

### Lychnis

2 to 3 ft. June to August
Chalcedonica. (Jerusalem Cross.) This is a very desirable perennial to plant
in liberal masses. Because of its extreme brilliancy, there are few other flowers that can so effectively produce those bright spots in a border, that contrast so wonderfully with blues, whites and dark reds. It has a long flowering period and is ideal for cutting. The flowers are fiery scarlet, borne in immense clusters, each flower form-

ing a distinct Maltese cross. Excellent for massing in borders and beds.

Chalcedonica alba. A white form of the preceding.

Either of above, 35c each; \$3.75 per doz.

## Oenothera Glauca

(Evening Primrose) ½ ft. June-August

This is a hardy perennial border plant of value, which grows to about 18 inches in height, and gives an abundance of beautiful yellow flowers. Price, each 35c; dozen \$3.50

## Primula polyanthus

(Primrose) 6 to 8 in. May, June

Gold-laced. Forms a beautiful rosette of large leaves, and bears clusters of ruffled flowers of fine form and rich colors, all laced handsomely with gold.

25c. each; \$2.50 per doz.

Primula (Polyanthus)

## Duckham's DELPHINIUMS

"The most talked of in the Land"

NOW GROWING IN THE BETTER AMERICAN GARDENS FROM 'FRISCO TO MAINE.

T IS seven years since I first introduced these treasures of English Origin to the American gardening public. It was at the great New York Spring Flower Show of 1923, when a few specially forced plants for the occasion, first drew the attention and admiration of a great flower-loving throng, causing them to gasp in joyous amazement at the wonderful coloring and fine formation of the flowers.

(Continued on page 15)

## Duckham's Delphiniums Exclusively

—were used (with other plants) in these magnificent borders —see photo below—to a winding grass pathway, leading to the residence of a well known Long Island Estate (name omitted by request). At Right—Note the sturdy growth and tall tapering spike on this superb Duckham Hybrid.

A Magnificent Duckham Hybrid

It was the first time that anyone had attempted to force Hybrid Delphiniums (Larkspurs) into bloom for show purposes (March 18th or 20th), but it afforded me the only opportunity of demonstrating to the patrons of this greatest of all American Flower Shows, the unusual merits of these hybrids, and though they do not attain their maximum height and vigor when forced in this manner, everyone who saw them unanimously agreed that nothing so beautiful and won
(Continued on next page)

Special Medal from Westchester Hort. Soc. 1927

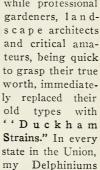

## GLORIOUS DELPHINIUMS

derful had ever been their good fortune to behold, a verdict which was appropriately backed up by the Horticultural Committee in awarding them a Special Medal.

Since that occasion, my Delphiniums have secured noteworthy recognition from judges at shows all over the country, while professional

Duckham Hybrid, Mauve and Blue (Semi-Double)

GOLD MEDAL

A special award from New York
Hort. Soc. International Show, Spring
1927 and numerous awards elsewhere

now form conspicuous colonies in the gardens of estates famed for their beauty.

It is possible that those who bought from me in these early years, could duplicate their orders now, yet not receive one that is identical with any of those—my first releases. I am continuously in touch with my original English sources, importing seed saved from their latest selections, and consequently the strains I am now distributing show many novel shades and forms that are decided improvements.

The spikes are of huge proportions, standing five and six feet high on "walking cane" stems. Some of these are broad at the base tapering to a fine point. Others are columnar, like five or six hyacinth spikes joined end to end. Again some spikes are compact, with the individual florets touching and overlapping, while others have a more open formation, so graceful in the estimation of connoisseurs.

The flowers are quite double in some spikes, showing distinctly two rows of petals,—others are semi-double, while there are quite a number of the single-flowered sorts also, exhibiting special individual charms.

## GLORIOUS DELPHINIUMS

The colors cover the complete range from deepest Indigo Blue and Violet to the faintest Lavenders, Mauves and Peach-cheek hues, almost bordering on true pink. And the flowers are not confined to one or two shades. We find deep blue with white and a brown "bee" (center of flower); violet purple, purple and light blue with black "bee"; lavender, pink, light blue and yellow "bee" and a host of other four-tone effects, all in the one flower.

Such combinations are unusual; it is such combinations that have made my Delphiniums famous — unusually famous, — it is such combinations that have pronounced them "Wonders of the Wily Ways of Wizards"

in plant hybridization.

Here is a Particularly
Fine Spike of My
"Wrexham Type"

Although these Hybrids comprise many new types, and delicate colors, all are extremely hardy, and well-established clumps in the border provide, year after year, wonderful spikes of majestic size and great beauty. They are also very desirable for cutting for indoor decoration, lending a delightful tone to mixed flower gatherings, harmonizing extremely well with vellow and orange colored flowers, particularly the deeper blues, violets and purples.

Duckham Hybrid, Plum-purple
(Semi-double)

#### PREVENT DELPHINIUM BLIGHT

The following mixture is very effective. I teaspoonful of Black Leaf 40 to one gallon of soapy water (any kind of soapy water will do—its action is only a "spreader"). Spray frequently and thoroughly with above.

(See Prices on next Page)

Sherbrooke, Canada, Aug. 20, 1928.

<sup>&</sup>quot;The inimitable mixed hybrid Delphiniums that I have purchased from you heretofore have been very ovely, so I am desirous of obtaining some more of equally good stock."

Duckham Hybrid, Compact Tapering Spike (Sky-blue)

DUCKHAM'S
DELPHINIUM SEED
INIMITABLE MIXED

Saved Only from Choicest Varieties (Cultural Directions Enclosed with Each Order)
PER PKT. \$2.00

"A gracious award by American Aristocrats to English Aristocrats."

Newport, R. I., 1928.

## Duckham's Delphiniums in a famous Garden

Gardens of Saml. Untermyer, Esq. "Greystone," Tarrytown, N. Y.

## Prices of Duckham's Un-named MIXED DELPHINIUMS

REGULAR GRADE: Price, per dozen \$11.00; per 100 \$85.00.

#### SELECTED TYPES and COLORS

Where personal selection is made by a customer in my fields during the Summer, I charge according to the merit of each plant selected. For those who cannot visit my grounds, but who desire some of these extra choice types, I have already put aside some of these and offer them as:

#### SUPER-HYBRIDS

Price, Each \$2.50; \$5.00 and \$7.50 and up

All the above are field grown clumps, thoroughly acclimated, hardy and will bloom profusely this year.

## Papaver Orientale

(Oriental Poppy)

The old oriental poppy is a well-known favorite and has no equal for brilliancy of color. This variety is of recent introduction and will be prized by those who desire something different and better than the ordinary crimson and scarlet shades. The color is a bright salmon-orange with the usual purple and black basal blotch. A striking contrast when fully open.

Price, each 75c; 3 for \$2.00; doz. \$7.50

#### Pansy

(Heartsease) 6 in. April-October

My strain of Pansies is well known, for I have taken no end of pains to develop it by careful "rogueing" each year, to eliminate everything that does not conform to my idea of Pansy perfection both in form, size and color. Visitors at my trial grounds proclaim it the best they have seen.

Papaver Orientale

International Prize Blue. International Prize Show. International Prize Mixed.

Price, Per 100, \$10.00; per dozen, \$1.50

## Platycodon

(Chinese Balloon Flower) 18 in. June-October

**Grandiflora.** Derives its synonym from the resemblance of the distended bud to a miniature balloon, which when open has the form of a Campanula. It is an extremely handsome border plant with deep blue flowers of lasting qualities either on the plant or when cut.

## Phlox divaricata

12 in. May to July

Laphami. A delightful variety of the well-known Wild Blue Phlox, with flowers of richer blue, produced over a long season. Delightful either in border or rockery.

Price, each 50c; doz \$5.00

## Phlox suffruticosa

2 to 3 ft. June, July

Miss Lingard. A charming snowy white variety, bearing immense heads of bloom earlier than the Decussata sorts. Invaluable for an edging to the tall delphiniums and looks handsome in front of an evergreen border.

Price, each 35c; doz. \$3.50

Seabright, N. J., Oct. 3, 1928.

<sup>&</sup>quot;The delphinium plants arrived today in beautiful condition, and I am sure they will be a great joy next summer."

A fine border of Hardy Phlox,—an all-summer delight

#### Phlox Decussata

(Perennial Phlox) 3 ft. June-October

Perennial Phlox succeed in almost any soil enriched with manure in Spring, and in hot weather an occasional soaking of water. If the first spikes of bloom are removed as soon as over, they will produce a second supply of flowers, continuing the display until late in Autumn. These later blooms are often finer than the first.

Elizabeth Campbell. I have an exceedingly fine healthy stock of this scarce but extremely popular variety. There is probably no better variety grown, and nothing that resembles it in color—a lovely salmon-pink with lighter edges and deep rosy red eye. The individual flowers are large, borne in immense trusses.

Price, each 50c; doz. \$5.00

Jean d'Arc. This is about the best of the White Phloxes, with its tremendous spikes of snow-white trusses; blooms in late season.

Price, each 35c; doz. \$3.50

Rheinlander. Flowers large, of a lovely salmon-pink shade, borne in large compact trusses.

Price, each 35c; doz. \$3.50

Thor. Ground color of salmon, suffused orange-scarlet, with a lighter margin around the eye. Very beautiful. Price, each 35c; doz. \$3.50

## Physalis francheti

(Chinese Lantern Plant)

A hardy perennial forming dense bushes about 2 feet high, producing quantities of bright, orange-scarlet, lantern-like fruits which are splendid for winter decorative use.

Price, each 35c; doz. \$3.50

#### Rudbeckia

(Cone Flower) 3 ft. July-October

Purpurea. Also called Echinacea Purpurea. Peculiar reddish purple flowers with a very large brown, cone-shaped center. Thrives in ordinary garden soil.

Price, each 35c; 3 for 85c; doz. \$3.50

<sup>&</sup>quot;The delphiniums which I purchased from you last Fall are growing nicely."

#### Scabiosa Caucasica

(Blue Bonnett or Pin Cushion Flower) 2 ft. June to September

### Duckham's New Hybrids

A decided improvement on the old Scabiosa both in form and color, all lavender and blue, somewhat of the shade of that extremely popular annual Didiscus coerulea (Blue lace flower); all those who are familiar with the latter will surely want my new Scabiosa. The assortment also contains a liberal proportion of rich blue and white shades.

> Price, each 75c; 3 for \$2.00; per dozen, \$7.50

Duckham's New Scabiosa

#### Salvia

#### (Sage) 2-3 ft. July-October

Farinacea. This beautiful Salvia is worthy of a prominent position in every herbaceous border. Although it is of tender constitution, it will withstand the severe winters prevalent in the Eastern States, with ordinary winter protection. The plant grows vigorously and produces its flowers in profuse spikes, the color being a delightful shade of pale blue.

Price, each 40c; doz. \$3.75

#### Statice

#### (Sea Lavender) 18 in. July-August

Latifolia. Plants with prostrate leathery leaves and immense candelabra-like heads. Very valuable either for the border or rockery. Minute purplish blue flowers in large sprays frequently 2 feet across. If cut and dried, lasts in perfect condition for months. Price, each 35c; 3 for 85c

#### Sedum

#### 18 in. August-October

Spectabile. A very valuable hardy plant and deserves liberal planting along the edges of Hardy Borders. It has thick succulent green leaves surmounted by huge flowering heads of thickly-clustered minute pink flowers.

Price, each 35c; doz. \$3.75

#### Sweet William

#### (Dianthus barbatus) 18 in. June-July

An old-fashioned hardy perennial which should not be left out of the list of beautifully colored, sweet-scented, old-fashioned flowers. Scarlet Beauty-Brilliant Scarlet; Pink; Dark Red, Variegated, Red and White

Price. Any of the above, each 30c; 3 for 65c; doz. \$2.50

Lenox, Mass., Aug. 22, 1928.

<sup>&</sup>quot;I want one dozen more of the same magnificent delphiniums that you sent me last autumn. They were truly wonderful.

#### Viola

(Tufted or Bedding Pansies)

These splendid little hardy plants are much prized for their quaint little flowers, peculiarly striped, each self-color having a delightful charm of its own. They increase rapidly, and soon form large colonies covered with their dainty blooms. They prefer a semi-shaded position and a little protection in winter. They make excellent edgings and borders, either in the herbace-ous border or around shrubberies.

Golden Yellow, White, Purple, International Prize (Mixed).

Price, Any of the above, each 35c; 6 for \$2.00; doz. \$3.50

Jersey Gem. A specially selected beautiful violet-blue variety which blooms unceasingly all season. A rare and choice sort.

Price, each 50c; doz. \$5.00

#### Veronica

(Speedwell)

Spicata. An elegant border plant, growing about 1½ feet high, producing long spikes of bright blue flowers in June and July.

Price, each 35c; doz. \$3.50

## DUCKHAM'S READY-MADE PERENNIAL BORDER, \$15

BECAUSE of their infinite variety and the great variation in the usefulness and season of blooming, many otherwise competent gardeners and flower-lovers are bewildered when they come to select the proper perennials for their garden.

To enable them to obtain the best effects, as well as to relieve very busy people from the task of making selections, I will make up a group of 50 Hardy Perennials of the finest types, in lots of 5 of each kind, enough for an adequate representation of each variety and to make a splendid little garden.

From such a charming little garden as this can be cut splendid flowers for house or table decoration from June until late autumn, and the best of it is that it will require very little attention aside from occasional cultivation and weeding. The plants will increase in size and strength each year and may eventually be divided and so extend the supply.

These 50 plants, 5 of each kind, all properly labeled so that the descriptions of them may be located in this catalogue, will be sent for

\$15.

# Hardy Ever-blooming GARDEN ROSES

A Well Planned Rose Garden—Plenty of Bloom by Massed Planting of a Limited Number of Varieties

## Special Offer of Best Twelve Hardy Garden Roses

(For descriptions see body of catalog)

To give Rose lovers an opportunity of having the finest roses in their gardens, I have selected the following as what I consider the 12 finest Roses in America today. All hardy, ever-blooming 2-year field-grown stock, grafted on the famous Multiflora Briar.

MME. JULES BOUCHE
GENERAL MCARTHUR
KILLARNEY QUEEN
CLAUDIUS PERNET
LOS ANGELES
MME. BUTTERFLY

MME. CAROLINE TESTOUT
MRS. AARON WARD
RADIANCE
RED RADIANCE
DUCHESS OF WELLINGTON
MME. ED. HERRIOT

Price The above twelve fine Roses, carefully labeled and packed sent prepaid within 200 miles of Madison, N. J., for

\$10

## SELECTED EVERBLOOMING ROSES

ABBREVIATIONS: T., Tea; HT., Hybrid Tea; HP., Hybrid Perpetual.

"My Field Rose Plants" are American-grown, well ripened, 2 year-old bushes, worked on the Multiflora stock, known for its thorough hardiness and its ravenous feeding propensities, whereby it produces vigorous well-branched bushes and enormous flowers.

Prices: All roses listed in this catalogue, unless otherwise noted, are \$1.00 each; \$10.00 a dozen; \$75.00 per hundred.

Novelties: These are sold at the each rate, in any quantity ordered.

Betty. HT. I think this Rose has the loveliest buds of any variety. I have ever seen. They are long, tapering, with exquisitely curled petals, tinted with soft shades of pinkish buff and copper. The open flower is very large and fluffy, almost creamy white, sprinkled over with a sheen of pale gold.

Betty

Double White Killarney. HT. I like this Rose for its slender, symmetrical buds and its delicately folded and curled snowy white flowers. One of the very few good white Roses because it blooms well and is not too tall. It has all the beauties of the famous Killarney race, with the added attraction of a most desirable and rare color.

Charles K. Douglas. HT. (Novelty) Fine, long pointed buds opening to large, loosely formed flowers of striking crimson-scarlet; slightly fragrant. Strong, branching growth and an abundance of healthy foliage.

A particularly fine red garden Rose with great depth of petals and clear, unfading color. Exceptionally good growth; free from disease. One of the finest red garden Roses in existence and ought to be much better known.

Each, \$1.50

Dame Edith Helen. HT. (New)
Perfect buds developing into wonderful flowers of immense size are produced singly on well-foliaged strong canes freely throughout the season. The flowers are composed of very substantial broad petals which curl back prettily forming a glorious long pointed bud and a full double flower which is beautiful in every stage of development. Color a brilliant yet soft Rose du Barri pink; strongly sweet-scented.

Each, \$1.50

Westhampton Beach, L. I., April 21, 1928.

<sup>&</sup>quot;The Roses purchased of you last year were very fine stock, and I trust these now ordered will prove the same."

Duchess of Wellington. HT. For a long time I regarded this as the best yellow Rose in the world. First place must now be given to Souvenir de Claudius Pernet, but the old Duchess still has prettier buds and larger flowers. It grows well, too, after it is once established, and is far too valuable to discard for many years.

Etoile De Hollande. HT. (Novelty) Brilliant red blooms of magnificent size, perfect in half-open state, showing clean, attractive centers when fully open; petals enormous; very fragrant. Plants branching, particularly free flowering and healthy.

A splendid Rose with no serious faults. Color holds remarkably well, becoming lighter instead of bluing. Toward fall, the flowers are larger, fuller, and darker red. Easily the most dependable and easy-growing red Rose with anything like good form. \$1.50 each.

Francis Scott Key. HT. If I only got one flower a year from this Rose, I should feel well repaid. The flowers are extremely large and solid, with an almost unbelievable number of beautifully curled petals, and at its best the color is clear, sparkling crimson-scarlet, with rich velvety shades. It is not so good in hot or damp weather because the many petals wither in the heat or become water logged, but in cool, dry spells in autumn it is simply superb.

General MacArthur. HT. Bright crimson buds, developing into moderately large, bright crimson-scarlet flowers; of fine form and delightful fragrance. An upright grower, branched, and produces its flowers freely through summer and fall. Its color is more brilliant and lasting in a cool situation and as summer wanes. Fine for cutting.

Henry Ford

H. V. Machin. HT. A sturdy, stocky bush, with flowers borne on the top of rigid stems in the manner of the best Hybrid Perpetuals. The blooms are large, well-formed, and glowing scarlet-red.

Henry Ford. HT. Medium-sized buds and flowers of very lasting yellow, edged in the early stages with salmon-orange, becoming lemon-yellow as they open. They are slightly fragrant and borne in sprays and clusters of great decorative value. The plant is bushy and rather tall, blooming constantly in great abundance. Each \$150; doz. \$16.50.

Julien Potin. (Golden Pernet) HT. This is one of Mr. Pernet's latest achievements, which will probably become better known as "The Golden Pernet." It is unquestionably the most gorgeous and brilliant yellow Rose yet introduced, a rich golden yellow that grows richer and deeper as the flowers mature. The buds are long and shapely, and develop into large, full flowers of beautiful form; delightfully sweet-scented.

#### HARDY EVERBLOOMING ROSES-Continued

Lady Ashtown

Lady Ashtown. HT. Not just another pink Rose, but decidedly a pink Rose with a great deal of character. The petals are definitely reflexed and pointed and the center rises in the way of the best exhibition bloom. With its handsome flowers, good growth, and excellent blooming qualities it stands high in the rank of dependable Roses.

Matchless. HT. Bud very large, longpointed. The deep cerise-pink flower is immense, very double, with intensely strong fragrance, lasting well, and comes singly on

long, strong stem. Foliage abundant and large. Growth vigorously bushy.

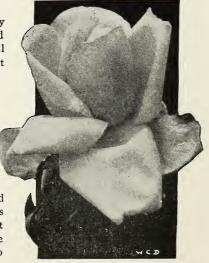

Each \$1.50; doz. \$16.50

Miss Lolita Armour. HT. If you can imagine a combination of copper and cream, with only the slightest trace of yellow, the tints of this Rose may be realized. The flowers are very double, globular and nod on the tips of long, slender stems.

Kaiserine Auguste Viktoria. For many years this old Rose has been regarded the most beautiful and perfect of all white varieties in shape and distinct in color. It is pure snowy white.

Killarney Queen. Years ago, the famous old Killarney was the finest that money could buy, but it did not have enough petals to satisfy everyone. This descendant of it has a richer and more brilliant pink color than Killarney, and more petals. I like it.

Los Angeles. HT. Color, form, and fragance are the notable virtues of this Rose. It has a flaming golden pink tint unequaled by any other, and an exquisite shape and perfume that are difficult to match.

Matchless

#### HARDY EVERBLOOMING ROSES-Continued

Mme. Caroline Testout. HT. Clear, glistening, satiny-rose, lighter towards the edges. A strong grower and persistent bloomer; flowers are large, full, tragrant and freely produced.

Mme. Butterfly. HT. A very dainty Rose of pale pink and gold which is delicately and superbly finished in all respects. I believe that Mme Butterfly is almost the ideal garden Rose.

Mme, Edouard Herriot. HT. Few flowers of any kind can equal the gorgeous color of this Rose. The buds are burning red and copper, and the open flowers brilliant orange-pink, with an immense golden center. Of the Roses in this new color, few have ever approached this variety in dependability and beauty of flower. I think it is one of the very best of its type.

Mrs. Aaron Ward. HT. Everybody likes this little flower, which nestles on such a vigorous little bush. buds are golden buff and fawn, opening to very double flowers of palest

Radiance

Mme. Caroline Testout. HT. Clear, glistening, satiny-rose, lighter towards the edges. A strong grower and perant golden suffusion in the high-pointed center, giving a distinct coppery red effect. Strong bushv. and healthy with good stems and a most unusual color. Each \$1.50.

Mrs. F. R. Pierson. HT A crimson rose, "flooded with sunshine." As a commercial or garden red Rose, Mrs. F. R. Pierson has never been equalled. It can be grown to larger size than American Beauty, even at its best. It has an equally large flower, better color, with fine, heavy dark foliage, strong stems, and very fragrant. Each \$1.00.

Padre. HT. For sheer brilliance, Padre is the prize-winner. The flowers are large, freely produced on rather tall, slender plants which should be planted in closely spaced masses. They are fiery copper-red, paling with age to glowing orange-pink, and make an unforgettable show. One of the best new Roses of its color.

Premier. HT. The florists have sold this Rose in their shops for many years, and it has always been a popular favorite. The flowers are large, dark rose-pink, and borne on strong stems.

Radiance. HT. Of all Roses, probably this is the most popular in the country. The flowers are round and cuplike, sometimes with a sort of balloon center, and of bright, shining pink contrasted with a lighter, silvery sheen. The plant is very strong and blooms with the utmost freedom.

Red Radiance. HT. A sort very similar to Radiance in all respects except its splendid, light red color. The two belong together in big masses where they will furnish bright color and good flowers for cutting all summer long.

F. Page-Roberts. HT. A Rev. magnificent Rose which has created a sensation everywhere. The flowers are gigantic, glowing golden yellow, with a coppery red sheen spread over the outside of the petals giving them an indescribably rich and sumptuous effect. It blooms best and the flowers are handsomest in the autumn. \$1.50 each.

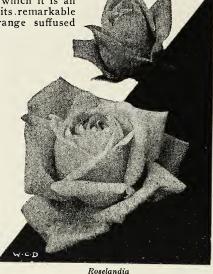

#### HARDY EVERBLOOMING GARDEN ROSES, continued

Roselandia. HT. A brilliant sport from the popular variety Golden Ophelia, over which it is an improvement not only in color but in its remarkable free-flowering habit. It is golden-orange suffused

with a lustrous glow of apricot in the heart and at the base of the petals, frequently tinted red on the reverse of the outer petals; the buds are long pointed, of superb build and substance, and very sweetly scented. \$1.50 each; doz. \$16.50.

Souvenir de Claudius Pernet. HT. For years I had despaired of ever seeing a good, pure yellow, hardy garden Rose, but this is it. Naturally it is not perfect, but it is a splendid variety with exquisite, golden yellow buds and fine open flowers. The foliage is healthy, and it blooms very freely. A bed of it is a splendid sight. \$1.50 each; \$16.50 per doz.

Sunburst. HT. A pretty Rose of golden yellow and brownish buff. The plant is not very strong, but the flowers are lovely.

Wilhelm Kordes. (Novelty) Unique and entirely distinct in coloring; a rich capucine red with coppery suffusion overlaying a golden-salmon ground, varying in intensity under different weather conditions, but always beautiful and particularly high colored early in the season and in the autumn. The buds are long and pointed, opening to double high-centered very fragrant flowers. Each, \$1.50.

## STANDARDS OR "TREE ROSES"

The beautiful Standard Roses are made by budding the ordinary dwarf Roses on tall Rose-stems 3 feet or more above the ground, developing round, bushy heads which display their flowers at the level of the eyes where they are most effective.

They are exceedingly rare in America and require considerable care to grow them well. They should be planted in carefully prepared ground and be copiously fed with liquid manure throughout the summer, and most carefully protected in the winter.

At the time of planting, a strong stake should be set to each plant, and the stem tied firmly to it, especially at the top to prevent it from swaying and loosening itself in the ground. It is best to set the stake on the south side of the plant.

Plant them at salient points in the garden, in the centers of wide beds in a circle about a pool, along walks to give a formal avenue effect, or let them stand sentinel-like, at the entrance to the garden.

Carpet the ground under them with lower Roses or with small bedding plants, such as violas or pinks. They repay good care.

This season I can offer the following varieties which are described on the preceding pages.

Betty, Mme. Jules Bouche, Killarney Queen, Mrs. Henry Morse, Lady Alice Stanley, Souv. de Claudius Pernet, Eldorado.

My plants are carefully grown on good straight stems. \$3.50 each; \$30 for 10

## **CLIMBING ROSES**

Anyone with a square yard of ground at his disposal can have one splendid Climbing Rose upon it; and it is doubtful if he could put the ground to any better use.

They are so various, these Climbing Roses, both in their unparalleled beauty and their easy adaptability to many situations and uses. Use them for covering or screening objectionable objects. Use them for decorative arches, or to cover summer-houses or garden seats. Use them on a trellis at the porch or trained about an entry or a window. Let them clamber along a fence or twine about a pergola, or even make a hedge of them by tying in and clipping back the branches.

Best of all, perhaps, is to grow them as pillars, which takes the least space; and anyone who likes Roses will want to crowd as many of them as he can into his garden. To make a pillar, plant a stout, slender post with the Rose and train the plant straight up to the top, or wind it about the support, keeping it cut off at the top, and the stray shoots tied in or cut off. The second season after planting, the pillar will be a mass of flowers from top to bottom and an object of admiration and delight to everybody.

Montclair, N. J., June 15, 1928.

<sup>&</sup>quot;I am indeed very glad to let you know that the roses which I purchased from you this spring are doing very well and are all in bud. The plants have grown larger than I have ever seen new plants at this time of year. The columbine which I purchased last autumn had beautiful blooms this month. I can heartily recommend the quality of your plants."

#### CHOICE HARDY CLIMBING ROSES

Price, \$1.00 each; \$10.00 per dozen; \$75.00 per 100

American Pillar. Unlimited in its vigor, this splendid climber will ascend to 20 feet or more, throw out long stems with enormous sprays of hundreds of large, single, brilliant pink flowers, lit in the centers with large white eyes and great clusters of golden stamens. Abroad, American Pillar has taken first place as the favorite Climbing Rose, and in this country its popularity has no end.

Dorothy Perkins. One of the first of the modern Climbing Roses, famous and beautiful old Dorothy is still among the best. Very vigorous in growth, with lovely waxy foliage and great clusters of frilly, shell-pink flowers, tiny but exquisitely shaped, it has a place in the affections of every flower-lover that nothing else can fill. Unequaled for covering arches, trellises, and summer-houses, and useful wherever a rapid-growing screen or cover is needed.

Dr. W. Van Fleet. In spite of the wonderful advances made in the Climbing Roses in recent years, none has vet surpassed this strong-growing old favorite which produces large flowers, similar to the finest Hybrid Teas, in hundreds on its tremendously vigorous canes. The flowers are of the palest possible shade of flesh-pink, with a slightly darker center, and they are likely to acquire deeper color late in the season, as it blooms over a long period and frequently throws a few flowers in late summer and fall. Unquestionably it is the most popular Climbing Rose in the country today.

Emily Gray. This is the long-wanted, golden yellow Climbing Rose, with large, beautifully formed flowers and handsome, shining foliage. It is a

wonderful and almost unbelievable sight when in full bloom, and people invariably go into ecstacies over it. Unfortunately, it requires winter protection in cold climates, but if it is grown as a pillar it can be easily wrapped with burlap or covered with a few boughs to shelter it through coldest seasons.

Excelsa. When Crimson Rambler was so much over-planted that it became a nuisance, Excelsa stepped in to replace it with giant clusters of less harshly covered flowers and a more pliant and more adaptable manner of growth. It is easily the best red Climbing Rose of the cluster-flowered type and is strongly recommended.

Gardenia. Belonging to a group of climbers with larger flowers than any of the foregoing, and of a soft, dainty yellow color in bud and early opened flower, Gardenia has long held first place among the yellow Climbing Roses. It is very vigorous and its foliage is particularly fine.

Paul's Scarlet Climber. Not so vigorous as the other climbers, this striking Rose is ideal for growing as a pillar over which it will hang its clusters of large, well-formed shining scarlet flowers in greatest profusion. One of the most spectacular of Roses, it is becoming widely known and tremendously popular.

Mary Wallace. Oueen of the large-flowered, pink clusters, Mary Wallace is regarded as the best of its class. The blooms are very large, cup-like, glowing pink, with a golden undertone, and are borne in clusters at the ends of long stems which are superb for cutting. It is hardy and grows most vigorously.

Watch Hill, Rhode Island, Aug. 4, 1928
"The climbing roses came this morning, and I am very pleased with the fine plants and with the promptness with which you attended to my order."

Paul's Scarlet Climber

#### CLIMBING ROSES-Continued

Silver Moon. Tremendous vigor and splendid polished foliage characterize this Rose, even without the splendor of its tapering golden white buds and its magnificent, semi-double, saucer-like flowers of purest white, illumined at the center with a giant frill of golden stamens. It is not so hardy as the others, and in the extreme North it should have some protection in winter. It is worth it.

### Planting and Pruning Roses

Planting To be successful in growing roses, next to securing good stock is the preparation of the soil. I would advise having the beds or ground where the roses are to be planted thoroughly prepared well in advance of planting time. The preparation of the soil is a simple operation by digging a foot or eighteen inches deep, thoroughly mixing in at the time of digging, plenty of well rotted manure. The addition of a little ground bone will be found beneficial. After the hole is dug, it is advisable to repeat the operation, for then you are sure that the manure is thoroughly mixed with the soil.

Scarsdale, N. Y., May 6, 1928.

<sup>&</sup>quot;I received the Aquilegia and Delphiniums from your nursery yesterday. They are splendid, sturdy plants and arrived in fine condition."

#### PLANTING AND PRUNING ROSES-Continued

Immediately upon receipt of your rose plants unpack them in a cool and shady place, sprinkling them with water. If your beds have previously been prepared the sooner the roses are planted in their permanent positions the better. If, however, this has not already been done it is advisable to "heel in" the rose bushes temporarily until they can be placed in their permanent positions. In planting, care should be exercised to make the hole larger than the root-diameter. Fill in with rather fine soil about the roots, using great care to make the soil very firm about them. After planting, thoroughly soak the soil with water to depth that it has been dug. Should the season be any way dry give thorough soakings at least once a week. After the roses are growing well a mulch consisting of straw-manure or decayed leaves over the ground prevents them from drying out too rapidly and keeps the soil in a much better and humid condition.

**Pruning** Next in importance to the selection of locality, and the careful preparation of the ground is the pruning of roses; in fact I consider pruning exceedingly important, because without it, you can never get vigorous growth and large blooms.

Visit the garden of any successful amateur rose grower during the latter end of February or early March and note the appearance of the bushes. If it should be a new planting of 2-year bushes the pruned stubs will be scarcely discernible peeping over the litter of manure covering the bed. Older bushes will have all the old wood cut away and the previous year's green growths cut back to within 2 or 3 eyes of the hard wood. Such an inspection will teach more than I can put in pages, and a few minutes' talk with the owner or gardener will indelibly impress upon your mind the object and importance of pruning. Most amateurs are afraid to use the knife or shears vigorously, and many of the fairer sex class an expert operator among criminals.

A conception of the principle of pruning may be gathered by comparing the sap in a rose shoot to a slowly moving river; it continues its tranquil course along the lines of least resistance. Cutting this shoot or damming the river creates an accumulation of energy at that point that eventually overflows with extraordinary force, bursting forth into as many shoots or rivulets as are necessary to carry off this surplus sap or water. Hence we get 3 or 4 vigorous growths, each carrying a flower on a long strong stem, from the sap that would otherwise have wasted its energy in nourishing one old worn out shoot. Pruning should be done in February or early March. Cut away all old wood (always particularly noticeable in the Rambler class), shorten all the young growths to from 2 to 3 eyes. Don't be as severe with those of vigorous constitution as those of more stunted growth. By careful observation and a little practice you will soon become an adept at getting the best out of your roses.

## Business Terms and Shipping Instructions

- To Insure early deliveries of Roses and Hardy Plants, and to avoid disappointments. It is necessary to order early.
- Payments. Cash or satisfactory references required from all correspondents unknown to me.
- Plants by Parcel Post. If to be sent by parcel post, add postage as follows: Single plants, 5 cts.; 3 plants, 10 cts.; 6 plants, 15 cts.; 12 plants, 25 cts. I accept no responsibility for delays or conditions that may prove injurious to the contents.
- Plants by Express. I recommend this mode of transit for more than 18 or 24 plants. All orders are carefully packed by expert hands, but I accept no responsibility for delays over which I have no control that may cause injury to the contents. I can make no adjustments unless complaints are made within five days after receipt of goods. Always state how you wish your order shipped, express or parcel post.
- Responsibility. Although exercising the utmost care in packing and routing orders, I cannot be responsible for damage due to the negligence or rough

- handling of common carriers. If the container appears damaged on arrival, sign for it as damaged and make claim on the express company. If considerable delay in transit would indicate fatal damage to contents, refuse delivery.
- I GUARANTEE MY STOCK TO BE EXTRA STRONG, BUT ASSUME NO RESPONSIBILITY AFTER SHIPMENT HAS BEEN MADE. I ALSO WISH TO EMPHASIZE THE FACT THAT ALL ROSES AND PLANTS I SEND OUT ARE VIGOROUS, HEALTHY AND TRUE TO NAME.
- All shipments should be opened and unpacked immediately on arrival; if dry, the plants should be watered and planted as soon as possible.
- Substitution. In ordering, kindly give a second choice, if possible, as many varieties are sold out as the planting season progresses.
- In the event that I should be sold out of any variety ordered, I will substitute the nearest variety of equally good stock and similar color, unless the order is marked "No Substitution."
